Havering Borough Council
Guide to supply feedback for
Provider Locality Risk Assessment

Overview

All children's homes and regulated supported accommodation for young people must create a Locality Risk Assessment. If a resource is being planned or operating in Havering the provider must obtain information from Havering Borough Council, the Metropolitan Police and North East London Integrated Commissioning Board (health).

The council is required to provide public information based upon a locality; this does not include personal information of any resident. The council supplies information, not an assessment of the location, or the appropriateness of the site, for a children's service, this is the responsibility of the Provider delivering the service.

This is a good example of a risk assessment from Medway:
https://democracy.medway.gov.uk/mgconvert2pdf.aspx?id=68447

Useful sources of information

In this document, we have shared some relevant additional sources, which you may find helpful, to establish an effective, up to date and localised location risk assessment for your OFSTED application.

An excellent source of the latest Havering service/agency related information (by ward) is the **Local Insight website**. This website contains a full range of demographic, service and population health, social and safety related data. This includes the wider determinants of health, communities and places, health behaviours and lifestyles, health and social care: Local Insight (communityinsight.org)[1]

Similarly, an excellent range of local information is available on the **Havering Data website** here: Havering – Useful Links (haveringdata.net)

Demographics

Havering is the third largest London borough, covering some 43 square miles. It is located on the northeast boundary of Greater London. To the north and east, the Borough is bordered by the Essex countryside, to the south by a three-mile River Thames frontage, and to the west by the neighbouring boroughs of Redbridge and Barking & Dagenham.

---

[1] Havering Council will refresh the Joint Strategic Needs Assessment (JSNA) chapter relating to 'Starting Well' by the end of 2023. This will be accessible via the Insights webpage.

The Census 2021 data published by the Office for National Statistics, shows the recorded population in Havering has increased in the last decade by 24,800 (10.4%), from around 237,200 in 2011 to 262,000 in 2021 - the largest population ever recorded through a census in Havering.

The growth in Havering is higher than our nearest statistical neighbours (7.9%), London (7.7%) and England (6.6%) but lower than the North East London (NEL) region (11.1%). The biggest growth has been seen in 25-39 year olds (an increase of 26.5%) and young children, with the 0-4 age group in Havering seeing the second highest growth of all local authorities in the country.
